

I support strong Net Neutrality backed by TITLE II oversight of ISPs! I do not care about Ajit's ties to Verizon and their history and support of removing oversight by being classified as TITLE I. We CAN NOT and MUST NOT trust the word of ISPs that they won't throttle content based on subjective decisions. They are a utility, same as WATER, GAS AND ELECTRIC. We are in an age that can not survive without an Open and Free Internet for all. KEEP THE INTERNET FREE!
